CSP GLOBAL
STAYING AHEAD

Managed Security & Enablement Provider

We are the world's first cybersecurity company to deliver enablement and compliance services as part of our 24x7 detection and response. We synergize AI capabilities with Human guardians giving you the edge needed to stay ahead.

We heard clearly how constant cyber-attacks were making leaders and IT teams feel, and we became boldly dedicated to delivering a service that provided measurable results with a human touch.

We felt businesses of all sizes should have access to the robust cybersecurity protection needed to operate successfully without constantly looking over their shoulder.
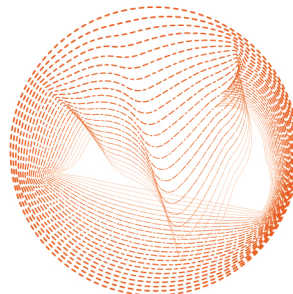

It had become abundantly clear to us that break-fix IT was waning, and that the synergy between AI agents and Human Guardians would change the world. Enter CSP Lighthouse, which provided a beacon of light, as we became the first Managed Security and Enablement provider in the world.

What is needed more and more, is a trusted partner that can deliver not only 24x7 detection and response, but also illuminate a journey to technology enablement. By adopting the full Microsoft stack that is already part of an existing licencing investment, the cost savings become too good to resist.

Our commitment was clear: Illuminate the path to secure, empowered digital transformation and find ways to do more with less.

"Hackers need only get it right once. We as defenders must get it right every single time!"

Callum Golding
CEO of CSP Global

Main Benefits

Eliminate and consolidate costly patchwork vendors saving up to 60 percent when using Microsoft security, compliance, and identity solutions.

Simplify the ecosystem gaining holistic and wider visibility and build resilience with clear roles and responsibilities, processes, and frameworks.

Protect your data and people with cutting edge threat protection, human guardians and AI-powered technology that keeps you safe around the clock.

Differentiators

World's first cybersecurity company to provide IT enablement and compliance as part of our service offering with a Microsoft Teams integrated CISO platform.

Intellectual capital that brings enterprise grade security to everyone for a fraction of the cost. Deployment of security as code for rapid deployment and protection when novel threats arise.

Highly skilled workforce and recognized as a Microsoft Security Solutions Provider.

About CSP Global

CSP Global is the leading provider of professional cyber, enablement, and compliance services across Australia. CSP has achieved renowned success providing a tailored and customer centric approach across multiple industries.

At the heart of CSP's mission are three core principles: eliminate, simplify, and protect. This engine drives our operation and helps our partners tackle modern challenges with confidence.

Eliminate and consolidate a patchwork of vendors. **Simplify** the digital estate to gain holistic and broad visibility. **Protect** the organization and build resilience by following industry frameworks and controls.
